

# Nest Detective

If you've ever been out for a walk, and looked at the trees and bushes closely, you might've noticed something: a pile of sticks, a ball of leaves, or maybe a poof of yarn and hair? You got it, they're nests! But what is a nest? Why do they all look different?

Your challenge is to take a walk, and keep a lookout for evidence of nests! Think about what kinds of animals build nests, and see if you can figure out who lives in each nest you find! You might need to do some quiet observation, so bring your patience be prepared to hunker down with a pair of binoculars!
