

Spaghetti Bridge

You will need:

- A pack of uncooked spaghetti
- Marshmallows (mini or regular will work) with a thin skin)

Procedure:

- Your goal is to build a bridge using only the raw spaghetti and marshmallows.
- Use the marshmallows as connectors for the noodles. You can build as simple or complex a bridge as you would like.
- Once you are done, place the ends of your bridge on the edges of two pieces of furniture. You can even test the strength of your bridge by placing items in the middle of your bridge.
- We hope you have a great time!
