

Wall Marble Run

For this program, you simply need a marble, some tape, and any household items you can find in order to create a track for your marble to run down.

The first thing you need to do is gather up your track supplies. These can be things like note cards, old toilet paper tubes, or anything else you can think of. Your goal is to make a path on your wall where a marble can run down it. For an added challenge, you can put a basket on the floor as a target for your marble to end up in.

Use tape to secure your track to the wall (make sure to have parent or guardian permission before taping anything to the wall). Once your track is created, test it out! Make any adjustments you need to, and keep trying until your marble falls into the basket.
